DETAILED ACTION

1. In view of the Appeal Brief filed on November 29, 2007, PROSECUTION IS HEREBY REOPENED. New Rejections of the claims are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

/Emmanuel L Moise/

2. Claims 1-18 and 22-29 are pending in the instant application and have been have been examined.

Drawings

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because The drawings are all replete with lettering, numbering, and figures that are hand-drawn and non-compliant. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the limitation "...said indicia of buffer behavior" in line 2. There is insufficient antecedent basis for this limitation in the claim.

* The Examiner attempted without success to contact the Applicant's representative via telephone on March 14, 2008 to resolve the 35 USC 112 2nd paragraph issue.

Allowable Subject Matter

6. Claim1-13, 15-18, 22-29 and are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art in the field does not teach the combination of features of the applicants claimed invention, particularly including:

As per claims 1 and 24, generation of an information stream by use an index that relates a first sequence and a second sequence of segmented, compressed image frames, and encrypting the re-sequenced segments and the index to form the stream,

As per claim 23, recovering an information stream by use of a decrypted index that relates a first and second decrypted and decompressed sequence image frames to form the recovered stream.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul E. Callahan whose telephone number is (571) 272-3869. The examiner can normally be reached on M-F from 9 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Emmanuel Moise, can be reached on (571) 272-3865. The fax phone
